

# MUSE TEMPLATE - SETUP INSTRUCTIONS

By [snd.website](http://snd.website)

1. Download the Adobe Muse website package (.zip). Extract the contents to a folder on your computer.

Name	Date modified	Type	Size
Assets	12.3.2015 r. 16:57 ч.	File folder	
HTML	15.3.2015 r. 19:21 ч.	File folder	
Setup Instruction	15.3.2015 r. 18:46 ч.	Adobe Acrobat D...	1 784 KB
Website-1	15.3.2015 r. 19:21 ч.	Adobe Muse CC S...	5 312 KB

The **assets** folder contains all of the images and graphics used throughout the website

Name	Date modified	Type	Size
Assets	12.3.2015 r. 16:57 ч.	File folder	
HTML	15.3.2015 r. 19:21 ч.	File folder	
Setup Instruction	15.3.2015 r. 18:46 ч.	Adobe Acrobat D...	1 784 KB
Website-1	15.3.2015 r. 19:21 ч.	Adobe Muse CC S...	5 312 KB

The **.muse** file is the working file for your website. This will open in Adobe Muse.

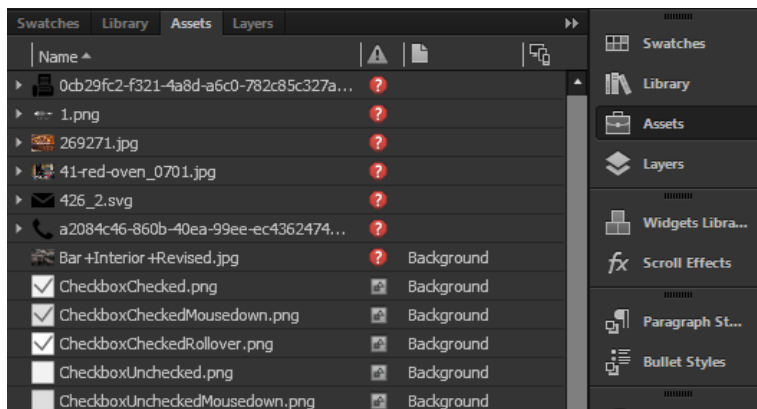

Or

Name	Date modified	Type	Size
Assets	12.3.2015 r. 16:57 ч.	File folder	
HTML	15.3.2015 r. 19:21 ч.	File folder	
Setup Instruction	15.3.2015 r. 18:46 ч.	Adobe Acrobat D...	1 784 KB
Website-1	15.3.2015 r. 19:21 ч.	Adobe Muse CC S...	5 312 KB

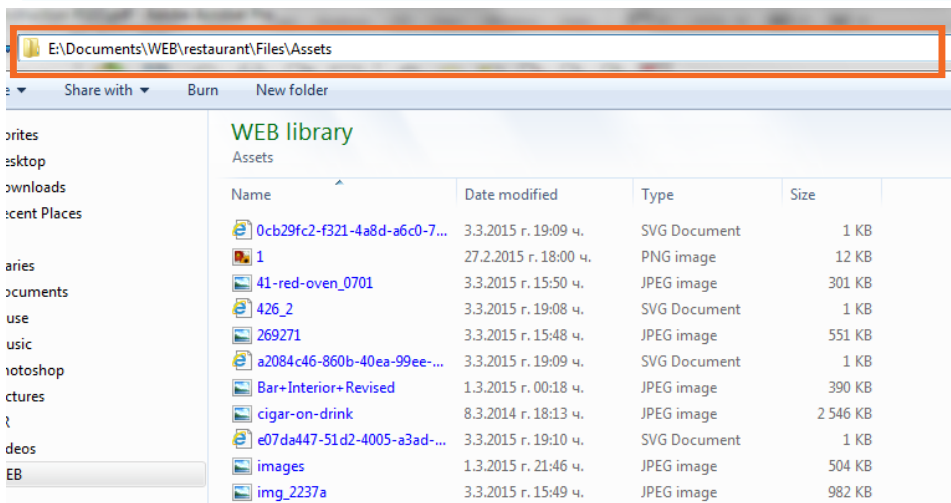

The **html folder** have all working file for your website.

You can Edit with what software use for **HTML Edit if you dont like to use Muse software**

2. Open the .Muse file. In the assets panel on the right, linked assets (images / icons) are displayed as missing. You can relink the file by selecting the all, right clicking and selecting “relink assets”.

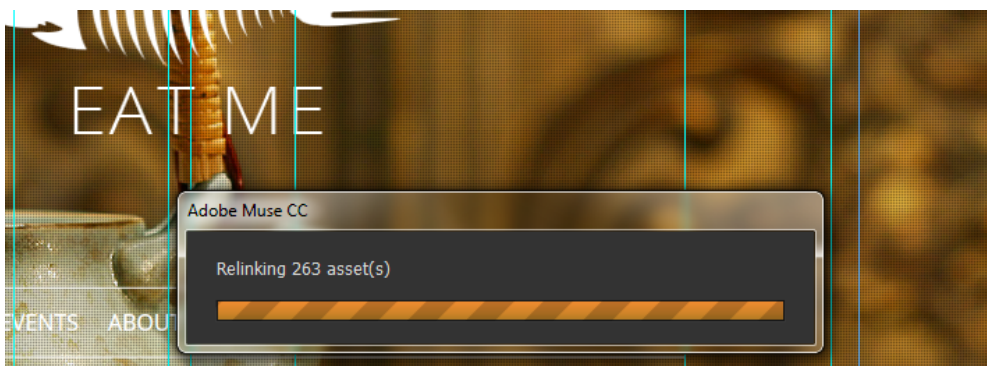

▲ Indicates missing assets with RED

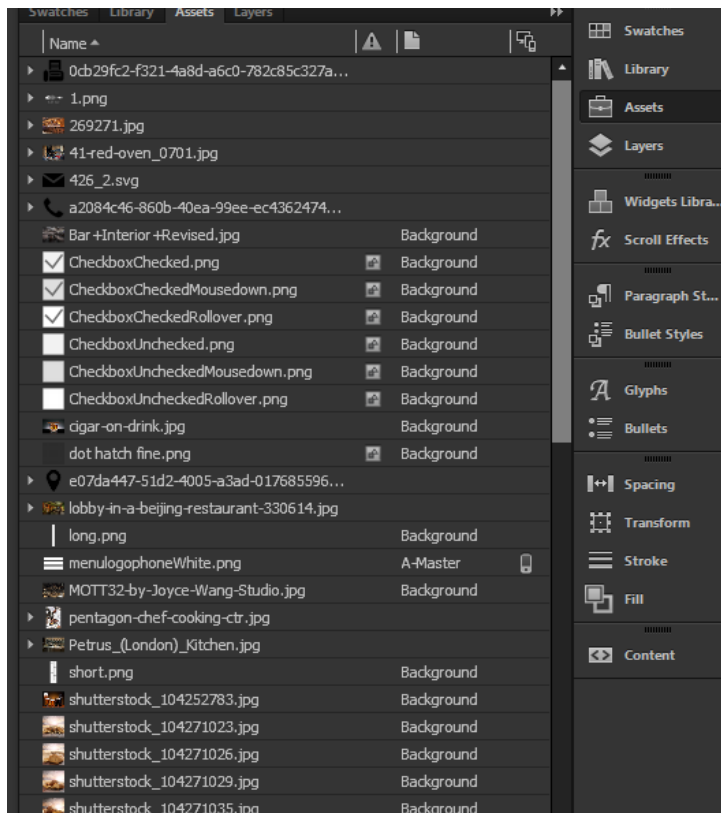

Navigate to the assets folder, and select the item displayed in the menu bar to relink it.

All of the other assets that are missing (and are located in that subfolder) will be automatically relinked.

Repeat these steps as needed for additional subfolders.

Assets are successfully updated to the new location on your computer.

Good Job!

▲ Indicates everything is OK

To add a "event" with yacht or something other please see this tutorial <https://www.youtube.com/watch?v=bU7Q3mexsQ4&feature=youtu.be>
